COURSE TOPICS

OSHA, Infection Control and the CA Dental Practice Act: *This course will not only entertain you and your staff but will enable attendees to meet license renewal requirements and state and federal requirements for OSHA Bloodborne Pathogen training, and infection Control with Noel Kelsch. The California Dental Practice Act segment will include:* Basic requirements of the Dental Board, how to avoid Dental Board problems AND Present actual case studies of dentists subjected to Board discipline.

Plus a Bonus Course- How to Grow, Manage and Protect your Dental Practice: *The course reviews the difference between employee vs. independent contractor, compensation structures and the impact on the associate's pay, California law pertaining to associates, issues to be concerned with in an associate contract, associate buy-in opportunities, as well as other relevant issues.* The course then reviews dental partnerships: how they are created, proper vs. improper models CA. regulations pertaining to partnerships, compensations formulas that work/don't work, buy in/out formulas, death/disability issues, management concerns, and other unique partnerships issues. The final phase of the course takes an in depth view of selling your existing dental practice: the importance of the lease and the various provisions which can destroy the value of your dental practice, the buy/sell agreement, restrictive covenants, redo work, uncompleted dental work, collection of accounts receivable, representations, and warranties, as well as numerous other issues that can have a significant impact on the individual dentist.

Hands-on Interceptive Ortho: During this lecture, Dr. Veis will review what every GP should know in the recognition and early treatment of orthodontics. Topics will include space maintenance, anterior and posterior crossbites, habits, maintenance of the airway and preventing growth and development problems using Orthodontic and Orthopedic appliances. Upon completion of this course, you will learn to how to recognize the problem, how to treat the patient (diagnosis, case selection, appliance selection, appliance adjustment, and appliance repair) and how to get the most out of your appliance. **Attendees will work hands-on to:** diagnose, within a group setting, a specific case, plan the treatment using the appropriate appliance and then practice an actual appliance adjustment and repair.

Updates in Pediatric Dentistry: *This course features a comprehensive update in Pediatric Dentistry, including:* New psychological insights and research on Behavior Guidance, the dental implications for the increase in Autism, preterm births ♦ ADHD caries formation and prevention as well as how to perform a CAMBRA caries risk assessment ♦ How using Xylitol, Fluoride Varnish, MI Paste, Chlorhexadine, and sealants are effective preventive measures ♦ Indirect Pulp Caps and MTA/Biodentine pulpotomies. ♦ New designs in tooth preparation & when to use GIC, RMGI's, and a new flowable composite for Class I to Class V preps ♦ Diagnosis and treatment of simple and complex traumatic injuries in addition to a simple method for splinting.

Minimally Invasive Adhesion Dentistry: *It is now possible to mimic the natural bond strength of the DEJ with certain techniques and materials. This level of adhesion enables the clinician to restore severely broken-down teeth with direct, low-stress, composite build-ups & onlays in lieu of full-coverage restorations. This lecture will review some of these techniques, materials and key research to perform advanced adhesion, including:* How to seal restorations & dramatically increase bond strengths prior to impressions & temporaries ♦ Layer composites with low-stress & double dentin bond strengths ♦ Identify & treat dentin cracks ♦ Virtually eliminate post-operative sensitivity ♦ How & when to place fibers in composites ♦ How to discuss advanced techniques with patients

Smile Design & Ceramics: Case selection, tooth prep, material choice and then proper bonding techniques will be presented in a practical manner. Smile Design principles will be covered including rational for new practical principles that result in pleasing natural-looking smiles. Many cosmetic cases will be presented for a variety of techniques using indirect restorations. We will go from treatment planning all the way through insertion with step by step instruction for conservative and more complex cases
